EB-570

DATASHEET

Teach with high-quality images and fewer shadows using this 2,700 lumens projector from the world's leading projector manufacturer[1]. The EB-570 projects a large image from a very short distance thanks to its ultra-short-throw capabilities.

Quality image
Epson's 3LCD technology ensures high-quality images with equally high White and Colour Light Output for vivid colours and bright images, even in daylight, and three times brighter colours than leading competitive projectors[2]. HDMI input means that students benefit from sharp, clear projected images.

Reliable
Project for longer with improved reliability and a longer lamp life of up to 10,000 hours.

More control and collaboration
The multi-PC projection software allows teachers and students to share their content simultaneously. The moderator function allows teachers to remain in complete control since they can choose when to display student content – ideal for interaction in a collaborative teaching or training environment.

Save time
Simply plug in and turn on – there's no warm-up time, and with a wall-mounting bracket included in the box, it's easy to get started.

Wireless projector
The wireless capability allows you to share content easily from a range of smart devices using the iProjection App[3].
